DixiTech CNC

RETROFIT REBUILD REMANUFACTURE SPECIALISTS

DixiTech CNC specializes in the remanufacture, retrofit, rebuild and service of metal cutting machine tools. We're specialists with gear machines, turning centers, machining centers and have extensive experience with other metal cutting machines. Our production process and our CNC mechanical aptitude allows for streamlined machine rebuilding. We have years of experience working with precise tolerances in industries including aerospace, automotive, marine and critical defense applications. We support engineering software design for the following CNC/PLC Controls; Siemens, Fanuc America, Allen Bradley, Mitsubishi Electric and Automation Direct.

CNC Design and Upgrades
- CNC Upgrades
- Systems Integrator

Gear Machines
- Hobbers
- Shapers
- Bevel & Hypoid Generators
- Grinding Machines
- Testers

Metal Hardening
- Quench Presses
  - Gear and Bearing
- OEM New Quench Presses
  - Standard Size or Custom Design

Metal Cutting Machines
- Turning Centers
- Machining Centers
- Boring Mills

* New DQ914 Quench Press

* Remanufactured
Six Axis CNC Machining Center

Since 1984

"The expertise that you have in the area of machine tool rebuilding is second to none...I personally would highly recommend that any company looking into rebuilding machinery give DixiTech CNC a chance to prove they can do the job, I am glad that we gave them an opportunity."
Jeff Grimmet - Bell Helicopter-Textron

"DixiTech was an excellent partner in our effort to achieve improvements in quality and safety."
Rob Proctor - Rolls-Royce Aerospace

About Us:
Leading a team of highly qualified software, mechanical and electrical engineers/techs, President/Owner Richard Patrick transformed DixiTech from a strictly mechincal rebuild business to a full turnkey retrofit house.
